

At Thermax Babcock & Wilcox, “Steaming Coffee” Is An Energizing Experience !

At TB&W we thrive on challenges. Whenever you have a problem seemingly imposing, you will find a solution in TBW. The instances are plenty, Take the Nestle example. When Nestle needed a mill to fire among other fuels, wet coffee grounds containing 80% moisture, they chose TBW. Our engineers designed a 14 TPH Atmospheric Fluidized Bed Boiler capable of firing (in combination with other fuels.) these high moisture spent coffee grounds that as near to burning water as one can get!

And there is no dearth of such examples. The Thiru Arooran Sugars Co -generation Boiler the 70 TPH. 66 Kg/cm²g bagasse cum lignite fired cogeneration boiler, which will help generate electricity for export to the state grid, 01 the conversion of KRIBHCOs 275 TPH gas fired boilers to NGL firing are two other examples of effective and innovative energy solutions offered the hallmark at TBW.

Whenever faced with unique steam generation problems, our customers have found invaluable solutions at TBW. This isn't surprising when you consider that TBW's engineering excellence comes from being a part of Babcock & Wilcox, the most reliable name in Steam Generation the world over

Take a look at what gives TBW a distinct edge when it comes to Thermal Engineering.

Satellite link with B & W's main frame computer In Dallas USA Technology is real time.

Design capability to ASME code Certified under ISO 9001 (Design Manufacturing, Supply, Election & Commissioning of boilers)

125 years of expertise available In controlled B & W manuals

In-house proprietary programmes for structural analysis. gas flow modelling, piping stress. thermal performance

and circulation checks with fully equipped CAD centre.

In fact, boilers supplied to Saudi Arabia, USA, Egypt, Phillipines, Thailand, Zambia and more, stand witness that TBW's engineering excellence is internationally accepted.

When the success of your entire plant depends on the performance of your boiler, just put your faith in TBW; and find out what scores of TBW customers already know that Thermax Babcock & Wilcox. is synonymous with Excellence in Thermal Engineering and reliability in Steam Generation Equipment.
